

▪ Scope

These GL Guidelines apply to container ships with Class Notification RCP xxx/xx (Refrigerated Container Stowage Positions)

▪ General criteria

- ambient air condition: 35°C, RH 70%
- max. temperature in container holds: 45°C
- max. seawater temperature: 32°C

▪ Air supply

Following values may be used as a guidance:

- 3100 m³/h per 20 ft refrigerated container
- **4500 m³/h per 40 ft refrigerated container**

(a reduction of the a.m. values is recently being discussed under EcoDesign aspects)

▪ Testing

Maximum deviation of air flow at each outlet shall be $\pm 10\%$ of the rated flow.
